

Center for the Advancement of Process Technology

U.S. INDUSTRY ORDER FORM

Product development is subsidized by federal funding sources; thus, CAPT is able to offer products to U.S. entities at significantly reduced rates. If you are an industry or educational partner operating outside the U.S. OR educating non-U.S. citizens, you must obtain an international license from CAPT.

1 Be sure all information is filled in properly. Please allow 14 business days for course set-up or product shipment. For web-based course orders, you will be billed for the number of individuals on your official WebCT roster. Your order includes access to the training course modules as well as related quizzes and exam content. Your instructor is responsible for customizing any additional material and/or making any alterations to the course.

Important note:

Due to recent transitions in our work processes, students will have until December 31, 2011 for all online course completion under the present format in the Web CT learning management system. After January 1, 2012, a new learning management system and ordering system will be made available.
